

ADJUSTABLE TEMPERING VALVES

4.00

DESCRIPTION

The adjustable tempering valves are designed to prevent scalding by ensuring a preset maximum water temperature.

Licensed plumber required for installation.

Can service one or multiple water outlets.

Safety valves are also available for use in basin, baths or showers to shut down water supply in the event of cold water supply failure.

Available in 15mm or 20mm diameters.

APPLICATIONS

Ideal for people living with dementia who have impaired sensory perception, and unable to interpret when the water temperature is too hot.
