

MAGI-PLUG

4.05

DESCRIPTION

Magiplug is a bath and sink safety plug that works using a pressure activated system.

The normal plug is replaced with a Magiplug, and when the water level in a bath/sink reaches a certain depth, the plug releases the excess water prior to flooding.

Designed to prevent bath and sink overflow causing water damage to the home. Also has temperature sensitive colouring giving an immediate indication of water that is too hot for bathing.

APPLICATION

Ideal for people living with dementia who have impaired sensory perception, or a tendency to be distracted when filling the bath or sink and unable to interpret when the water temperature is too hot.
