

# WIRELESS ALARM DOOR SENSOR

# 4.12

Sensor and radio transmitter unit

## DESCRIPTION

A small magnetic sensor and radio transmitter unit, or magnetic strip is mounted at the top of the door to be monitored. When the door is opened, a signal is sent to the wireless alarm receiver/buzzer.

This sensor is battery powered and gives a low battery warning.

## APPLICATIONS

This single Receiver Unit is portable and can be plugged into a power point in the carer's room/living room etc.

Receiver Units can be moved about as required.

### Purchasing information:

Door Sensor \$95.00

Single channel receiver \$195.00
