DESCRIPTION

Designed to be as easy as possible to operate for the person with dementia. Setting up the player is undertaken by friends, family or carers, as a one time process. Operation is highly intuitive and does not require any prior knowledge or memory to start and stop the player. The styling is also reminiscent of old radios and is instantly recognisable as something which plays music.

People with dementia need to be able to complete tasks with as few steps as possible. Something as simple as adjusting a radio can be quite complicated.

These radios overcome this with a simple one touch, one step, on-off process.
