Blue Phone (A) is a telephone as well as a based emergency call system that operates over analogue or GSM phone telephone connection.

The system consists of a waterproof pendant that is worn on a lanyard or wrist strap, and a speakerphone.

The speakerphone features volume control, hearing aid compatibility; large buttons including speed-dial picture buttons, battery backup, and talking calendar/clock function with date, day and time annunciation.

Can be set up as non-monitored or monitored, and other alarms can be linked to the system such as a smoke detector or PIR (activity) sensors.

Blue Assist Home (B)

The base unit’s two-way voice communication with Blueforce’s 24-hour monitoring centre connects you to a personalized emergency support network, including care providers, family members, ambulance and emergency services. Emergency calls can be activated throughout your home and garden, by pressing your pendant or the red help button on the base unit.

Purchase price $495.00
