**DESCRIPTION**

If you’re concerned that a parent or loved one is becoming forgetful or finding it difficult to manage on their own, it’s a big help to be able to check how well they are managing.

Easy to install wireless movement door sensors in the home generate a chart of activity, online. The charts provide information about night/day activity and when different rooms in the house are used e.g. toilet/kitchen.

Text and email alerts can be enabled to notify the carers when something is not as expected.

**APPLICATIONS**

Just Checking provides a live, online chart of daily living activities accessed via a smart phone, tablet or computer.

No phone line or broadband required. Radio based movement sensors with no wiring means easy, self installation. You can set text or email alerts to let you know if things are not quite as expected, such as:

» No signs of activity in the morning
» A care worker hasn’t arrived
» A door has been left opened
» A night time exit
