ORIENTATION CLOCKS

1.01

DESCRIPTION

A range of easy to see and read clocks designed to help orientation to time, day or date. Different styles of clocks may suit different people. It is beneficial to place the clock in an easily seen position for the person with dementia.

APPLICATIONS

These devices are suited to people with varying degrees of cognitive impairment with the need to be reminded of day, time or date.

Memory loss is often the first symptom to appear in someone who has Alzheimer’s disease, asking repetitive questions re: the time, day etc. is common for people living with this condition.

Use of orientation clocks may assist with this problem.
